

PROJECT FOCUS

To transform the current eCST-service provider user manual into an interactive help-guide.

DELIVERABLES

- Usability evaluation report and recommendations
- Development of interactive version of eCST-service provider user manual

The electronic Child Study Team system (eCST) is a Austin Independent School District-developed case management system designed for educators to house campus-created behavior, academic and attendance goals, and interventions; document services to students and their families; and progress monitor interventions. The tool houses case management capacity for every student enrolled in Austin ISD and is utilized by all campuses within the district.
