

PROJECT FOCUS

To create an intervention recommendation engine that is automated to provide responses for academic, financial, and situational risk for Capital IDEA case management model.

DELIVERABLES

- Exploratory analysis of data
- Development of three different types of predictive models for students' academic standing
- Set of recommendations for measuring student success and graduation rates moving forward

Capital IDEA's mission is to lift working adults out of poverty and into living wage careers through education and career advancement. It works towards this mission by providing financial support and extensive professional guidance to motivated, nontraditional students who want to earn more and move up in great careers in leading industries in Austin, like information technology and healthcare.
