

## PROJECT FOCUS

To analyze the impact of FE's shared application systems across its three geographic locations.

## DELIVERABLES

- Cleaned data sets for all three of FE's geographic locations
- R scripts developed for basic analyses of shared application system data
- Analyses of Apply Houston, Apply Austin, and Apply San Antonio shared application system data sets

**Families**  
Empowered

Families Empowered (FE) is Texas' only nonprofit dedicated to helping families find a school of their choice. Its goal is to show parents all of their options so that they can make an educated decision about which school is right for their family. One of the key ways in which FE works toward this goal is through the use of a shared application system for parents in its three geographic locations - Houston, San Antonio, and Austin.
