

PROJECT FOCUS

.....
 To support Community Tech Network in building out a data collection strategy and tools for tracking outputs and outcomes for its DigitalLIFT program.

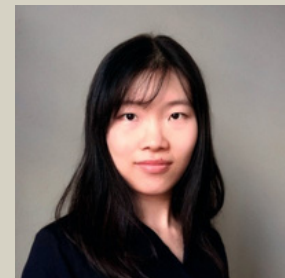

KEY ACTIVITIES & DELIVERABLES

-
- Researched various survey and data management platforms; made recommendations based on CTN's DigitalLIFT programming needs
 - Developed a diagnostic assessment tool for prospective, partner agencies to complete before engaging with DigitalLIFT programming
 - Designed pre- and post-surveys and modular assessments, for partner agencies and their clients participating in DigitalLIFT

Community Tech Network (CTN) strives to address long-standing social and systemic inequities by providing digital skills training, assistance in acquiring home internet, and a device. Since 2008, Community Tech Network has pursued digital equity by bringing digital literacy and internet access to digitally-excluded communities - no matter their age, income-level, or primary language.
